

PlantBook

By design

This is our landscape, what we see every day. This is our nursery, our home for baby plants. They are all orphans, and we hope each one finds a loving home. Our goal is this: the right plant in the right place at the right time. That doesn't happen by accident. It happens by design.

That's why we made this PlantBook, our guide to the best shrubs, flowers, and trees for Mid-Atlantic gardens. We hope it helps you choose the right plant for your landscape.

Arthur L. Palmer

Contents

 **Trees** *pages 58-69*

Shrubs

A Sure Foundation.

Shrubs are the backbone of the garden, the starting point for your landscape. Plant them as borders or hedges to define areas, as “foundation plants” to soften the transition from your home to the yard, or as specimens to be a focal point, the center of attention.

Shrubs can be evergreen or deciduous. Some are chosen for their foliage color and texture, others for their flowers or fruit. Some grow as tall as trees while others are groundcovers. Wise placement and use of shrubs can provide privacy, security, order, shade, wildlife habitat and stunning year-round beauty.

We have over 350 to choose from. Your shrub awaits.

'Kaleidoscope'^{PP16988}

Abelia

These mounding shrubs are easy to grow in sun or part shade; they need little more than an annual prune to keep them shaped nicely.

They are semi-evergreen (will drop leaves the colder it gets) with glossy green leaves that turn to a nice fall coloring around October. Their white or pink flowers attract butterflies.

'Rose Creek'

Aronia

arbutifolia

'Brilliantissima'

Narrow, dark green foliage. Small white flowers in late spring. Round, glossy red fruit. Bright red fall foliage. Good shrub border, woodland garden plant.

6-8' Tall X 5' Wide.
Zone 5. ☀️

Aspidistra

elatior

Cast Iron Plant

Reputation for withstanding neglect. Wide, dark green foliage. Inconspicuous creamy-white flowers. Good container, border, accent plant.

28" Tall X 3' Wide.
Zone 7. ☀️ ●

Aucuba

japonica

The green Aucuba have dark green, serrated glossy foliage and grow quite large: 8-10' tall by 6-8' wide.

The variegated variety, 'Gold Dust,' has even darker green, glossy leaves spotted with glorious gold. 6' tall by 4-5' wide.

Both varieties have gorgeous red berries on female plants. Zone 7. ☀️ ●

'Gold Dust'

Green

Azalea

Azaleas are evergreen rhododendron shrubs, blooming profusely in spring. The new, innovative Encore® series on the next page are repeat bloomers, and their popularity has made many of the classic varieties of the last century obsolete. We grow a select number of the very best traditional garden azaleas, presented here for your vintage Southern garden. Zone 7. ☀️

ENCORE

A Z A L E A[®]

More Blooms, More Often.[™]

Blooming in Spring, Summer, and Fall, you'll love the explosion of color Encore[®] Azaleas give you season after season.

Encore[®] Azaleas are very sun tolerant. Unlike traditional azaleas, Encore[®] Azaleas can tolerate full sun. In fact, 4-6 hours of direct sunlight or high filtered shade will ensure optimal blooming and growth.

Encore[®] Azaleas are cold hardy. University studies and extensive plantings throughout the Midwest and Northeast also show that the majority of Encore[®] Azalea varieties are cold hardy through USDA zone 6. ☀️ ☁️

Baccharis
halimifolia

Fall flowering evergreen shrub that does its best in wetlands and coastal conditions. Also known as Groundsel Bush or Saltbush.

5-12' Tall X 5-7' Wide.
Zone 5. ☀️ 🌧️

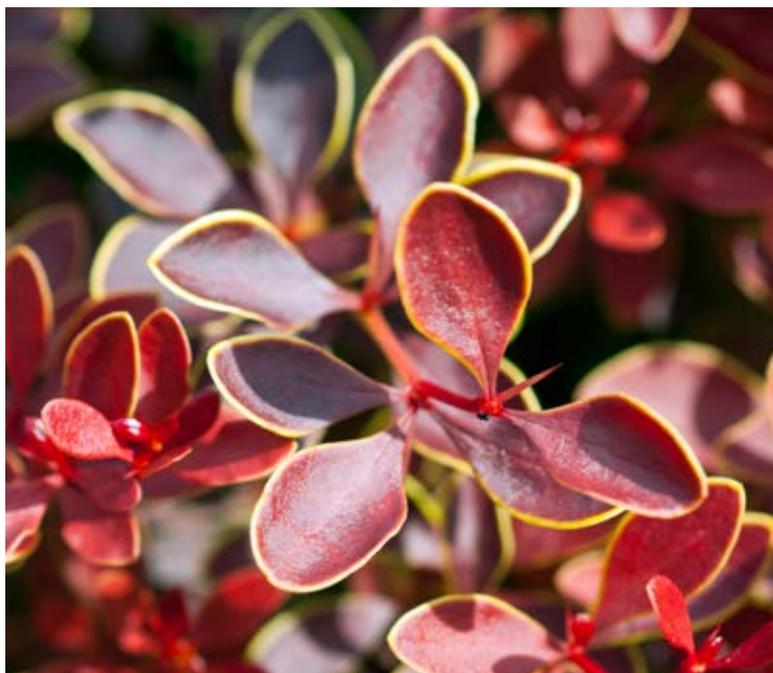

Barberry

You need to be careful around Barberries. From a safe distance, they are attractive landscape shrubs with bright foliage, but watch out for the thorns! Their prickly nature is one of their chief attributes, a great choice when you want to add an extra layer of security as well as beauty to a flower bed (not a bad choice to go under your daughter's window).

Barberry is tough and adapts itself to just about any growing environment, a quality not everyone appreciates. In recent years, Barberry has gotten a bad rap from some who claim it is invasive. There are over 400 varieties of Barberry. The one that really causes all the trouble is the green barberry, which we don't grow.

Hawthorne

Indian Hawthorne are mounding, compact, evergreen shrubs with leathery dark green leaves. They bloom profusely in spring, often developing small dark-purple fruits enjoyed by birds. The white or pink flowers attract butterflies.

Plant Hawthorne as a low-growing foundation plant or informal hedge. They like sun or partial shade, and need well-drained soil. ☀️ 🌧️

Native to India and Asia, Indian Hawthorne does great in the South, but does not perform well in colder climates.

Hydrangea

Bloomstruck® PPAF

Gorgeous Blooms.

Sure, Hydrangeas are beautiful shrubs, and their foliage looks interesting in all seasons. But let's be honest. The only reason we all have a love affair with Hydrangeas is for their wonderful, mop-head blooms. Enjoy them in your landscape or bring them inside as a cut flower.

Mainstays of the American garden since colonial times, modern varieties offer unique attributes. Some, like 'Endless Summer,'® rebloom, even on new growth. Others, like the 'Cityline'® series, maintain a tight, compact habit.

It's a good time to be a gardener.

Arborescens

Native to the Eastern United States, *Hydrangea arborescens* is a deciduous shrub once used medicinally by Native Americans. The bark has a peculiar tendency to peel off in several successive thin layers with different colors.

The best known cultivar is 'Annabelle.' Its small snowball flowers gradually turn from green to pure white. An improved variety based on 'Annabelle', 'Incrediball'®, has huge blooms.

Hydrangea arborescens | 3-5' Tall x 3-5' Wide | Zone 3. ☀️ 🌧️

'Annabelle'

'Incrediball'® PP20571

Macrophylla

The iconic hydrangea, *Macrophylla*, has large green leaves and mop-head blooms in blue or pink, depending on the soil pH. If you have pink and want blue, add aluminum sulfate. Are your blooms blue, but prefer pink? Then add lime. These grow to 7' Tall and Wide. Zone 6. ☀️ 🌧️

Cityline® is no flop.

Sometimes hydrangeas have weak stems, which makes them flop over when the rain loads down their large blooms. The Cityline® series of compact hydrangeas are the answer.

They are Macrophyllas with large blooms in vivid colors. They have strong stems with very glossy dark green leaves. They are extremely mildew resistant.

1-3' Tall x 3-4' Wide
Zone 5 ☀️ 🌧️

Lacecap

Lacecap hydrangeas are Macrophyllas with distinctive petals ringing the edge of the central mop, like lace around a modest ole woman's cap.

'Annie's Blue'® PPAF is a repeat bloomer with large flowers and a compact ball shape.
3-5' Tall x 3-5' Wide.
Zone 4. ☀️

'Mariesii Variegata' has white margins on pointed green leaves.
3-5' Tall x 3-5' Wide.
Zone 5. ☀️ ●

'Annie's Blue'® PPAF

'Mariesii Variegata'

Paniculata

Unlike most Macrophyllas, paniculata hydrangeas bloom on same-year growth. They are also more tolerant of sun and are more cold hardy.

Flowers start out white in late Spring. 'Limelight' and the dwarf version 'Little Lime™' hold a lime-green hue all summer. In Autumn, paniculatas really show off with combinations of green, white, pink and burgundy blooms.

'Henry's Garnet'

Ligustrum

Ligustrum, commonly known as 'privet,' is a large, dense evergreen hedge shrub, often used as a screen for privacy from prying neighbors. 'Rotundifolia' is better used as a specimen plant as it grows small and tight, with interesting curled leaves. 'Jack Frost' is variegated gold and green.

Cream white flowers in late summer can be very showy in a hedge planting. Dark blue-black fruit from September to November makes them popular with birds and other wildlife. ☀️

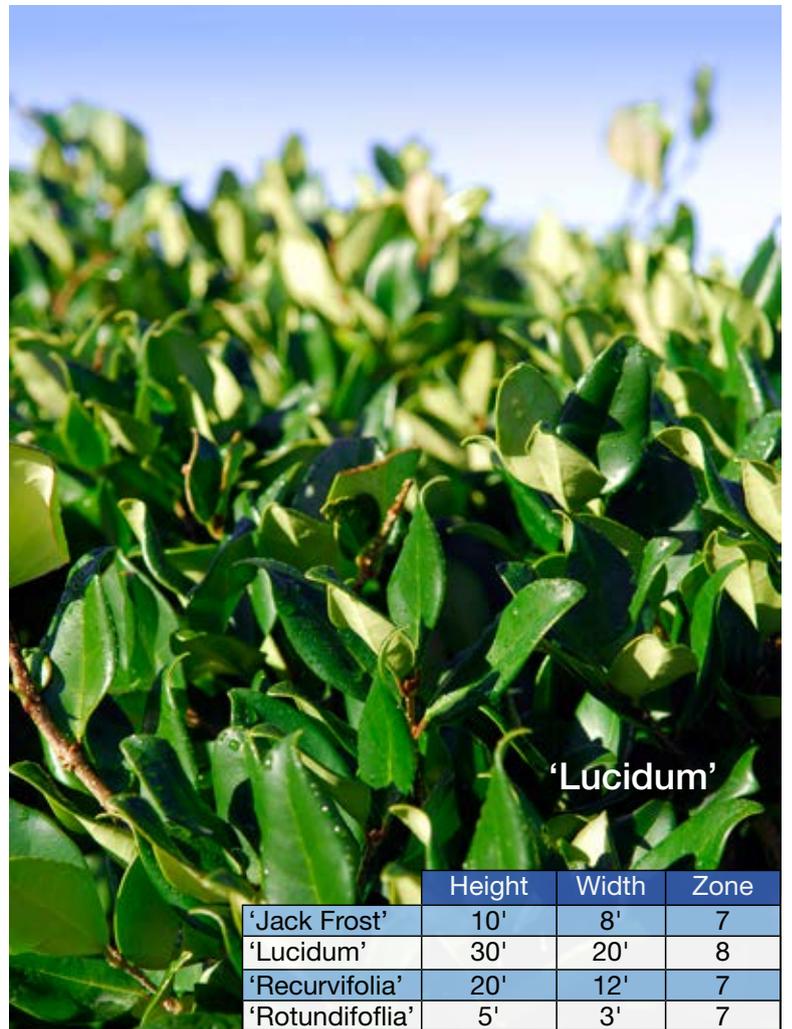

'Jack Frost'

Lilac

Lilacs, like the traditional 'Miss Kim,' have long been known for their fragrant lavender blooms in spring, but now 'Bloomerang'® PP20575 has changed everything. It reblooms in the summer, and its compact form doesn't need pruning. Unlike 'Miss Kim' which can grow to 8' tall, it stays under 4-5'. Both are hardy to Zone 4. ☀️

'Miss Kim'

Loropetalum

Loropetalum have burgandy-purple foliage and bright fuchsia, hazel-like flowers. They require no pruning except to maintain desired size. Select 'Purple Pixie'® and eliminate pruning altogether!

Hardy to Zone 7 except for 'Daruma' and 'Garnet Fire', they are Zone 8. 🌧️

Rosa

'Red Drift®'
PP 17877

DRIFT® GROUNDCOVER ROSES

Drift® Roses are a cross between miniature and full-size groundcover roses. From the latter they kept toughness, disease resistance and winter hardiness. From the miniatures, they inherited their well-managed size and repeat-blooming nature.

Continuously blooming from spring to frost (bloom cycle about every 5-6 weeks), they are naturally dwarf, with very attractive foliage. They are hardy to zone 4. ☀

Drift® Roses stay low and manageable, only 1-2' tall x 2-3' wide, making them perfect for small gardens, hillsides, perennial beds and even awkward areas. They brighten up borders and fill in empty spaces around your favorite established plants.

'Apricot Drift®' PPAF

'Coral Drift®' PP 19148

'Peach Drift®' PP 18542

'Pink Drift®' PP 18874

'Popcorn Drift®' PPAF

'Sweet Drift®' PPAF

Why is The Knock Out® Rose the best rose in the history of the world? It's so easy to grow! Combine low maintenance, disease resistance and drought tolerance with stunning beauty and generous blooms arriving constantly all through Spring, Summer and well into Fall and you have The Knock Out® Family of Roses.

They are winter hardy to Zone 5 and heat tolerant throughout the entire U.S. They thrive in almost every area of the country. If unpruned, The Knock Out® Family of Roses grow to 4-5' wide x 3-4' tall. A yearly cut to 12" above the ground after the last hard frost is recommended for maximum performance. ☼

Flowers

Outdoor décor.

Your yard is your canvas. Our flowers are your paints. And there's a lot to choose from; we have more than 500 different flowers, each perfectly suited to the Mid-Atlantic region.

You'll find plenty of colors to mix and match. Shapes and textures can be combined for symmetry and contrast. Flowers of different heights can be layered, and bloom times can be staggered to ensure four-season interest.

Prepare to get creative. It's time to stop and smell some flowers.

Achillea *Yarrow*

Achillea is easy to grow and is drought-tolerant once established. It blooms all summer long and needs full sun exposure. It's fern-like foliage is silvery or grey-green, and is fragrant, attracting butterflies while being resistant to deer and other garden munchers.

Deadhead to encourage reblooming. The flowers are sterile or not "true-to-seed."

Butterfly Weed

Fast growing with upright stems showing attractive summer flowers that butterflies will love.

tuberosa
3' Tall x 2-3' Wide.

Zone 4. ☀️

Astilbe

False Spirea

Brighten the shade.

Astilbes are the best solution to add a splash of intense color in your garden's shady areas as they bloom profusely from late spring into summer. They like moisture and are often planted beside ponds and water features. Foliage is fern-like, giving a woodland feel. They add a nice contrast to large-leaved shade plants such as Heuchera and Hosta. Some Astilbe are native to North America, but these varieties originated in Asia and most were hybridized, between the wars in Germany, by George Arends. Want something newer? The best new varieties are the 'Visions' series.

Canna

Exotic touch of class.

Cannas are tropical native plants with large richly-colored leaves and vibrant lily-like blooms on tall stalks. Their big flowers can make them top heavy so we now carry the Tropical Series of Canna, which is a dwarf variety that tops off 30" tall. The 'South Pacific' variety is a more traditional sized Canna that gets around 4-5' tall. The Tropical Series is Zone 7 and 'South Pacific' is Zone 8. These fast growing plants need full sun.

Zone 5. ☼

Clematis

Clematis is the most popular climbing vine-like perennial. These rapidly growing plants are excellent for arbors, walls, trellises and anything else you'd like them to climb up and over. Clematis bloom June-September, and when mature may be 10-12' tall. 'Paniculata' is the taller of the two, topping out at 20', and also has fragrant fall flowers. 'Sapphire Indigo'[™] gets to about 3-4' tall and can be trained as a climber to grow even higher. Zone 3. 🌧

'Paniculata'

'Sapphire Indigo'[™]

'Zagreb'

Coreopsis

Confident color all summer.

Coreopsis is a garden favorite because it blooms from June to September in full sun, thriving in hot, dry conditions. They are rugged, dependable and flower profusely. Coreopsis does not require a lot of maintenance. For optimum flowering, however, deadheading after the first blooms fade is recommended. After a few years, the clump may need to be divided in early Spring to keep it from overcrowding. ☀

Fern

Ferns have been around since the dawn of time, and they are botanically unique because they have no flowers or seeds. Instead, they have spores on the undersides of their beautiful green fronds. Perfect in shade, they'll transform your garden spot into a peaceful woodland forest. The most popular modern varieties of these prehistoric plants are 'Regal Red' and 'Autumn Brilliance' which offer unique color contrast to the traditional green fern.

Gaillardia

Gaillardia, a North American native, is commonly known as the “blanket flower” because its bright, bold blooms of red and yellow are reminiscent of Native American blanket designs.

Gaillardia isn't just beautiful, it's tough as well, thriving in hot, dry conditions in full sun. Tolerant of soils and salts, it's perfect for tough ocean-side environments. Perhaps its only weakness is excess moisture. In well-drained soil you shouldn't have any problems. They'll bloom late spring to early fall.

'Chef's Choice'^{PP18192}

'Prostratus'

Rudbeckia

Nothing says "It's Summertime" quite like a Rudbeckia. Lovely, daisy-like flowers are great in the landscape or in flower arrangements. 'TigerEye' blooms have an amber center instead of traditional black.

They bloom July through October. They are drought resistant once established, and like full sun.

'May Night'

Salvia

The name Salvia comes from the Latin word 'salvere,' which means "to save". This refers to the long-held belief in the herb's healing properties. It is a popular annual and perennial. These varieties are perennial in their respective zones.

'May Night' is the most popular variety. 'Black and Blue' has a very different looking bloom and grows quite large. 'Marcus' is a dwarf variety that grows to about a foot high.

	Height	Width	Zone
'Black and Blue'	4-8'	2-3'	5
'Caradonna'	2-3'	2'	4

Scabiosa

columbaria

Pincushion Flower

'Butterfly Blue'
Dwarf habit, long blooming period with lavender-blue flowers from May to September. Excellent edging, border plant.
16" Tall X 16" Wide.
Zone 3.

Scutellaria

suffrutescens

Cherry Skullcap

Dwarf habit and drought resistant with profuse pink-red flowers blooming from June to frost.

8" Tall X 12" Wide.
Zone 6.

Sedum

Sedums are extremely easy to grow, so easy, in fact, that they are the de facto plant used in green-roofs as they require such little care.

The low-growing sedums are great as groundcovers, filling in cracks and nooks, particularly in rock gardens. Perhaps that's why they are commonly called 'Stonecrop.'

The taller sedums bloom once late in the growing season, but look fabulous all year. Plant in full sun.

'Homestead Purple'

Low spreader. Deep purple flowers.

Blooms all summer. Excellent ground cover, accent, border or massing plant.

8-16" Tall X 18-36" Wide.

Zone 6. ☀️

'Royal Candles' PP18932

Veronica

For a no-fuss plant, you can't find much better than Veronicas, which start blooming in the spring and keep going through frost.

They make excellent bedding, border or massing plants.

The low growing dense foliage gives rise to narrow flowers spikes in blues, reds, pinks, and purples. Deadheading will keep them going all summer long.

Drought tolerant, Veronica likes a well-drained soil. Plant in full sun.

Trees

Timeless beauty.

It takes vision to plant a tree, but doing so will bless generations to come. Your children and grandchildren will enjoy all the many benefits trees provide: shade, oxygen and beauty.

But which tree to plant? Choosing the best trees for your landscape can be confusing. With so many variables in growing conditions, and an array of trees from which to choose, where do you start?

Don't be paralyzed into inaction. You've got the PlantBook. On the following pages, you'll see the best trees that we grow for the Mid-Atlantic region.

The best time to plant a tree was thirty years ago. The next best time is today. Let's get to work; the future generations will thank us.

Amelanchier

Serviceberry

'Autumn Brilliance'

Spreading, shrubby deciduous tree. Ovate, bronze foliage turns brilliant red in fall. White spring flowers yield delicious edible summer fruit.

20-25' Tall X 15' Wide.
Zone 5. ☀️ 🌧️

Bald Cypress

Taxodium distichum

Pyramidal, broad deciduous tree. Bright-green feathery foliage. Orange-brown fall foliage. Attractive shade, woodland garden tree.

70-150' Tall X 20-50' Wide.
Zone 5. ☀️ 🌧️

Birch

Betula

'Dura Heat'

A beautiful tree best suited to planting in groves of three to five with others of its kind. Will make an excellent narrow front yard tree for limited spaces. It's a natural around water gardens, natural pools, streams and other wetlands where it thrives in the moisture.

30-50' Tall X
20-30' Wide.

Zone 5. ☀️

Black Gum

Nyssa

'Green Gable' PP22951

Upright, conical form. Uniform branching makes for a great specimen, street tree. 50' Tall X 25' Wide.

Zone 4. ☀️ 🌧️

'Wildfire'

Dense, rounded form. Yellow, orange, red, and purple fall foliage. Great specimen, street tree. Lustrous, glossy burgundy new growth.

40' Tall X 15-25' Wide.
Zone 4. ☀️ 🌧️

Cedar

Cedrus

Blue Atlas Cedrus:

Upright, wide spreading evergreen tree. Steel-blue needle-like foliage. To 130' Tall X 40-50' Wide. Zone 4.

Blue Atlas 'Horstmann':

Irregular, semi-dwarf form. Icy-blue needle-like foliage. 20' Tall X 6-10' Wide. Zone 4.

Eastern Red:

A classic Virginia native, this fast growing, evergreen has foliage that turns reddish brown in winter. 50' Tall X 35' Wide. Zone 3.

Plant all in full sun.

Blue Atlas

'Horstmann'

Eastern Red

'Kwanzan'

Cherry Prunus

These cultivars of Prunus are not fruit producers, but are prized for their incredible display of flowers in Spring. 'Autumnalis' have double flowered blooms and like 'Kwanzan' is a smaller tree. 'Yoshino' is larger and its blooms are more whitish-pink. Plant all in full sun.

Two dramatic weeping-form cultivars available are 'Pendula', which has single pink flowers, and 'Snow Fountain'®, which has graceful, pendulous branches and white blooms. 'Pendula' likes full sun. Plant 'Snow Fountain'® in full sun to part shade. All are hardy to Zone 5.

	Height	Width
'Autumnalis'	25-35'	25-35'
'Kwanzan'	30'	20-25'
'Pendula'	30'	25'
'Snow Fountain'®	20'	15'
'Yoshino'	50'	30'

'Autumnalis'

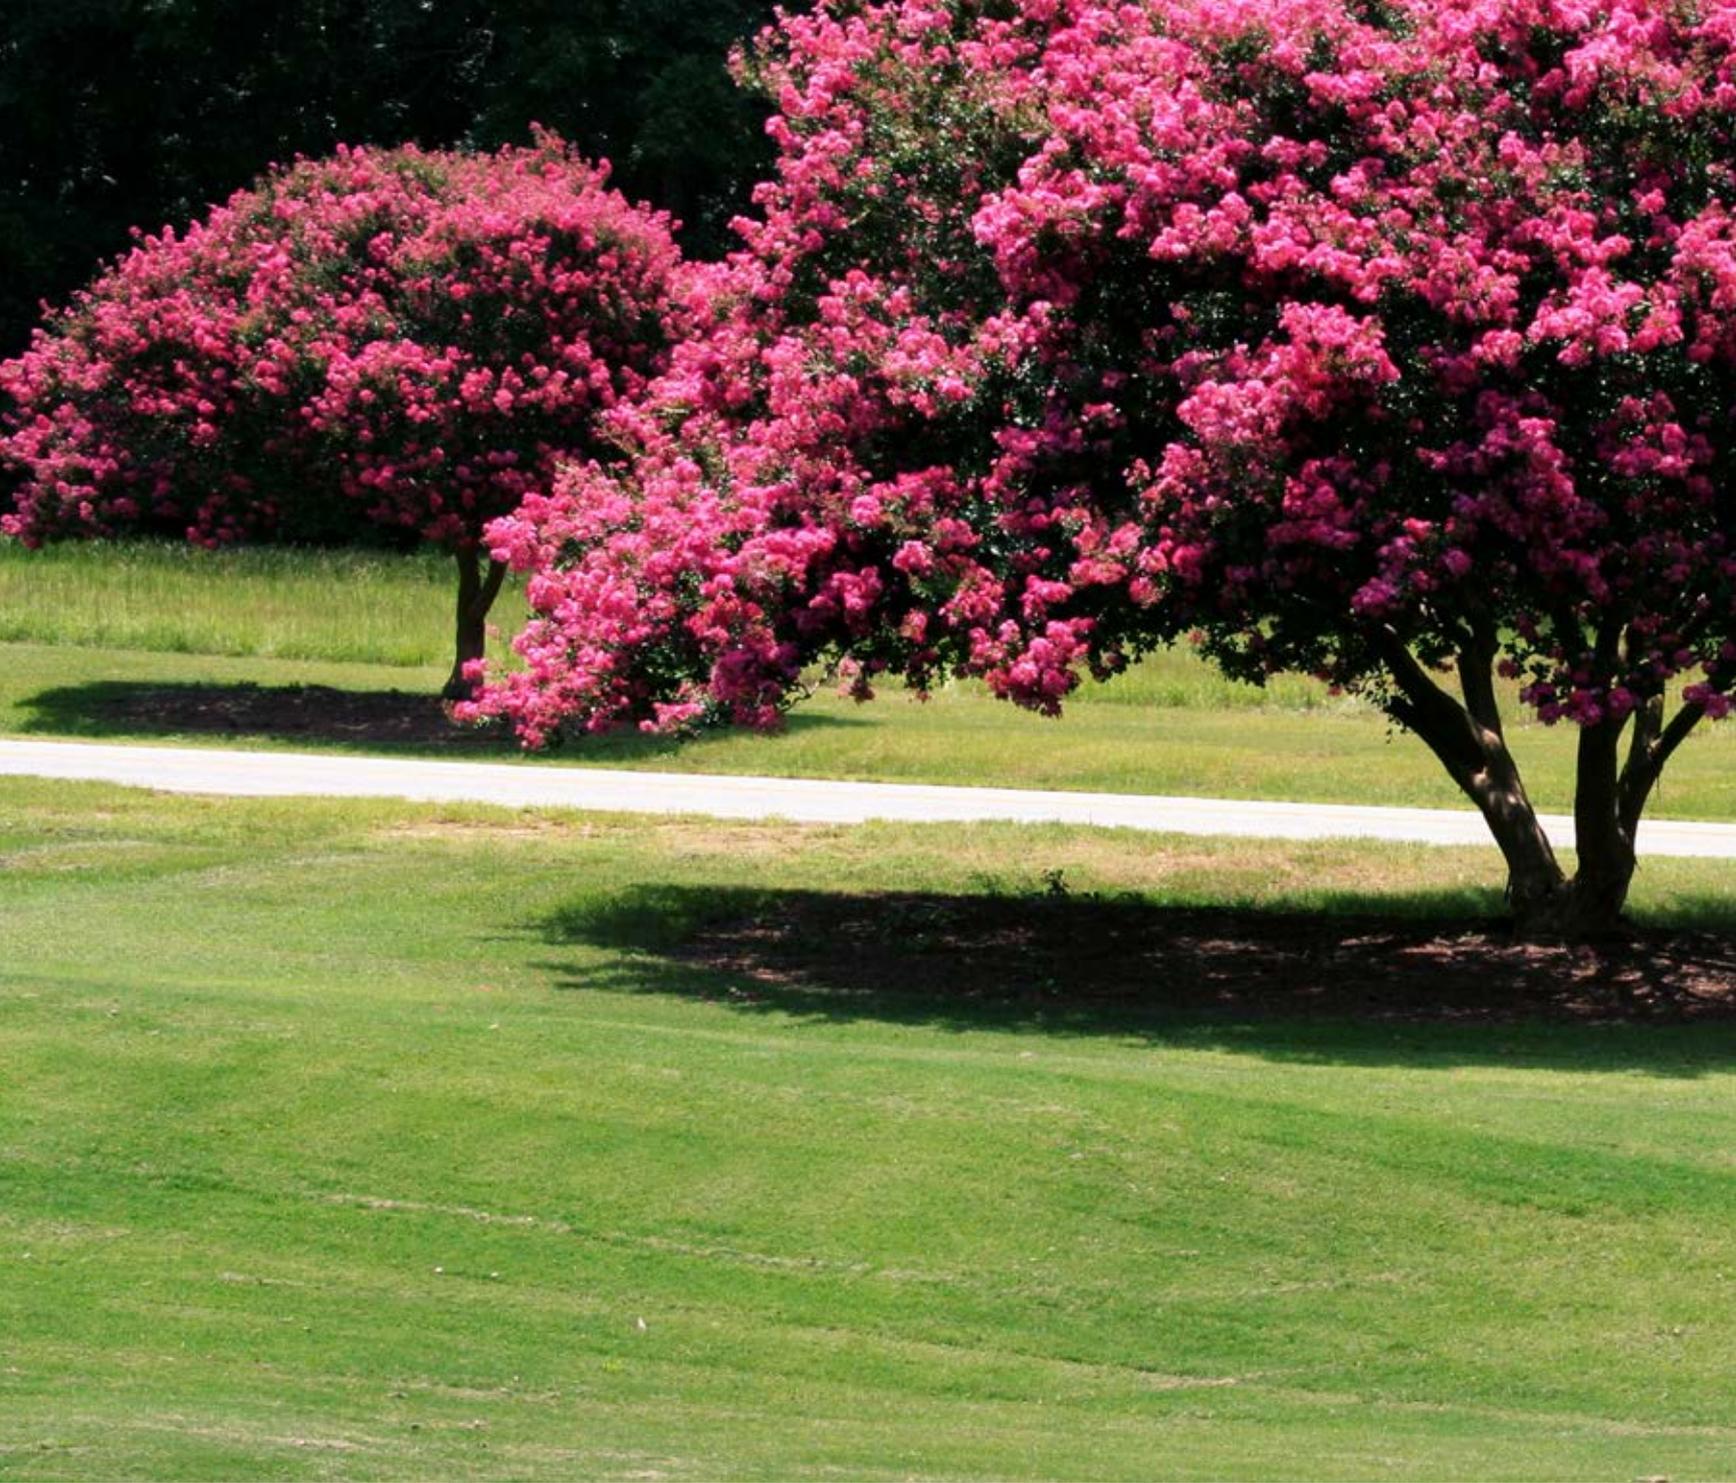

'Pendula'

'Snow Fountain'®

'Yoshino'

Crape Myrtle

No other tree or shrub can rival the show Crape Myrtles put on in the summer. Flower spikes of pink, purple, red, and white dazzle the eyes in the dead heat of July and August.

Their leaves turn brilliant red and orange in fall. Their peeling bark bring winter interest.

A very easy tree to grow, Crape Myrtles thrive in heat and humidity, tolerate drought, and grow very quickly. Pay close attention to the mature size listed in the tables. Make sure you don't plant them too close together. Due to the fast growth, some prune them too aggressively. To keep its form in shape, selective winter pruning is recommended (but please don't stump-cut them...its just not necessary and it shortens its life span). Plant Crape Myrtle in full Sun.

Elm

Ulmus parvifolia

'Allee'^{PP7522}

Upright, spreading form. Dark green, ovate toothed foliage turning yellow to purple and bronze in the fall. 40-50' Tall X 40-50' Wide. Zone 5. ☀️

Ulmus americana

'Princeton'

Dense, symmetrical upright vase form. Resistant to Dutch Elm disease. 60-80' Tall X 35' Wide. Zone 3. ☀️ 🌧️

'Allee' PP7522

Hawthorn

Crataegus viridis

'Winter King'

Upright, rounded deciduous tree with blooming clusters of fragrant white flowers. Toothed, lobed dark glossy-green leaved foliage. Red foliage in the fall with round, bright red fruit. Thorny branches. Salt tolerant.

40' Tall X 20' Wide.

Zone 3. ☀️ 🌧️

Dawn Redwood

Metasequoia glyptostroboides

Dawn Redwood

Ancient plant family dating from the Mesozoic Period. Upright, conical, coniferous deciduous tree.

70-130' Tall X 15' Wide.

Zone 5. ☀️ 🌧️

London

London Planetree

'Bloodgood'

Fast growing, heat and drought tolerant tree. Starts off as a pyramidal form maturing to a spreading, rounded form. Mid-green, lobed foliage. Makes an excellent, specimen, or shade tree.

85' Tall X 70' Wide. Zone 5. ☀️

'Princeton'

Magnolia

Our Southern Magnolias are upright, columnal trees that typically hold branches close to the ground. They have lustrous, dark green leaves with cinnamon brown undersides. Large, fragrant creamy-white flowers make their appearance in Summer. ☀️ 🌿

'Jane' is the exception with light pink and lavender flowers blooming in Spring, the first magnolia to show its flowers.

Oak Quercus

Many of the most popular trees are produced by modern methods. Maples, Magnolias, and Crape Myrtles can be fairly easily propagated asexually by rooting cuttings. In recent years, Maples in particular have most commonly been created in laboratories via tissue culture. This has allowed rapid development and crops of trees that are exact genetic replicas.

But the oak has proven difficult to root, and so far impossible to reliably create via petri dishes. We grow all our oaks from acorns, which means no two trees are quite the same.

And we figure that's the way nature wants it.

THE FINE PRINT: How's this for an anti-climax?. Page after page of gorgeous plant photos and now—right at the end—a bunch of words crammed on a page in text too-small to comfortably read. It's called "FINE PRINT," but it's not like "fine china" or "fine art." It's more like, "Can you FINE Waldo?" Everything you want to know—and an awful lot you don't particularly care about—is right here. This is where we stick all the things that just didn't fit anywhere else, and since nobody is likely to read this, we can have a bit of fun, too. We can also protect ourselves from frivolous lawsuits with disclaimers like this one:

DISCLAIMER: Lancaster Farms, Inc., nor any customer of said farm, their employees, family members, relations or heirs, casual acquaintances or vaguely familiar faces, be they a person or a business, using this PlantBook, or quoting facts or any content from this PlantBook, or in any way doing anything at all in connection with this PlantBook, hereby disavows any promise or implied promise or guarantee of the veracity or truthfulness of the contents herein, nor does any of the above-mentioned parties accept any responsibility, either expressed or implied, for anything that you, or your over-eager counsel, may think we are at fault about. We didn't do it.

(We just denied all responsibility by making this disclaimer.) **COPYRIGHT:** The PlantBook © 2015 Lancaster Farms, Inc. **PHOTOGRAPHY:** We have made every effort **TO** use only photography that we have taken ourselves, purchased, or obtained permission to use. Most of the images were *photographed by our print and media designer, Leon Guanzon*. Stock photography used under license from Shutterstock. **PHOTOGRAPHY CONTINUED:** If you'd like to use one of our photos, you may. Simply send an e-mail to photos@lancasterfarms.com and—provided that it is, in fact, a photo we took ourselves—we will send along to you the highest resolution version we have. For \$0. **WHO ARE WE?:** Lancaster Farms, Inc. is a wholesale container nursery in Suffolk, VA. We **GROW** on approximately 250 acres on three separate farms. We sell wholesale to the horticulture trade only. **NO RETAIL SALES,**

EXCEPT we operate a seasonal outlet at our main location where we sell to the public a small selection of some of the plants we grow. We call it, rather originally, the Plant Outlet. Our customers are landscapers, independent retail garden centers, municipalities, and companies, firms or other entities that have their own landscaping or grounds maintenance crew(s). **Our Mission:** Is to NOT make meaningless, long-winded mission statements with lots of fine print and that nobody reads, like "we strive to maximize synergy and unleash creativity for long-term profitability of all stakeholders by increasing efficiency, driving productivity and sparking innovative collaboration for our customers, partners and employees who we just put to sleep because we're so boring." Yikes! We keep it pretty simple. Two words guide us, actually. People & Plants. (The ampersand doesn't really count as a word, does it?) **The Purpose of the PlantBook:** We hope to inspire people to understand, appreciate and desire great plants—whether they buy their plants from us or not. Sure, we'd like to sell more plants, and we'd really like to be able to sell them for more money. (Who doesn't want to have more money?) But as silly as it may sound, we really believe in the **POWER OF PLANTS**, and we desire to see more people use landscape, ornamental plants, regardless of where the plants come from. As **A** manufacturer, we work through our customers to serve the final purchasers of our plants. We hope this PlantBook helps our customers be more successful at selling plants and passing on the great passion we have for People & Plants.

HISTORY: We were founded in 1969 by Charlie Parkerson and the late Bob Bock. Art Parkerson and Chris Brown own and operate the nursery today. **PATENT:** Many plants listed in the PlantBook are patented and are the exclusive property of their respective holders. You can tell which plants are restricted because we've included the **PLANT** Patent (PP) number on each of them. If you are a patent holder and we have misrepresented your plant, we apologize. Please let us know of our mistake so that we may correct it in the future. **PATENT CONT: THE PROPAGATION OF, AND/OR THE SALE OF PLANT PARTS IS PROHIBITED WITHOUT A LICENSE. TRADEMARK™:** PRODUCT NAMES, LOGOS, BRANDS, AND OTHER TRADEMARKS FEATURED OR REFERRED TO WITHIN THE PLANTBOOK ARE THE PROPERTY OF THEIR RESPECTIVE TRADEMARK HOLDERS.

NO CLAIM IS MADE TO THE EXCLUSIVE RIGHT TO USE THESE TRADEMARKED PROPERTIES APART FROM THE MARK AS SHOWN. **DISCRIMINATION:** Lancaster Farms does not discriminate on the basis of race, color, national origin, gender, disability or religion. **WARRANTY:** *We give no warranty as to continued life of any nursery stock sold at wholesale. Complaints to be considered must be made in writing within five (5) days of the receipt of plants.* **EXCLUSION OF OTHER WARRANTIES:** THE LIMITED WARRANTY STATED ABOVE AND BELOW

IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED. LANCASTER FARMS AND ALL AGENTS OR ASSIGNS HEREBY EXPRESSLY DISCLAIMS ANY AND ALL OTHER WARRANTIES OF ANY KIND OR NATURE, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR USE, OR FUTURE GROWTH. NO WARRANTIES OR REPRESENTATIONS MADE AT ANY TIME BY ANY REPRESENTATIVE OF LANCASTER FARMS OR BY ANY CUSTOMER OF LANCASTER FARMS, SHALL BE EFFECTIVE **TO** VARY OR EXTEND THIS LIMITED WARRANTY OR OTHER TERMS.

AVAILABILITY & PRICE LIST: Please note we sell wholesale to real, legitimate businesses in the green industry in the Mid-Atlantic region only. Our inventory is updated constantly. Call us toll-free at 800.336.2200 or Local 757.484.4421 for availability and pricing. We can send inventory availability by fax or e-mail. Once you are a customer, you can access availability and pricing online. You can even order online, at our website, anytime, even in your pickup truck.

OUR LIMITED WARRANTY: Lancaster Farms warrants its plants to be true to name, to be apparently free of creepy, gross and dangerous pests (insects) and serious, contagious plant diseases, and to be in good living condition at time of delivery. Buyer's remedy is limited. It is the sole discretion of Lancaster Farms to replace any plants determined to be defective and covered by this limited warranty. "True to name" means we deliver the correct plant cultivar.

LIMITATION OF LIABILITY: Under no circumstances shall Lancaster Farms be liable for anything having to do with this PLANTBOOK, its contents, distribution or interpretation. **MISTAKES:** We have made our best effort to get everything correct, but it is likely the PlantBook contains some errorz. We do not guarantee the accuracy of the PlantBook. If you find a mistake or if your personal experience varies from what is described in the PlantBook, please let us know! **CONTACT:**

LANCASTER FARMS, INC. | 5800 KNOTTS NECK ROAD | SUFFOLK, VA 23435

WWW.LANCASTERFARMS.COM | LOCAL PHONE: 757.484.4421 | FAX:757.686.8637 | TOLL FREE: 800.336.2200

HARDINESS ZONES: Hardiness Zones listed are intended as a guide. Results may vary, based on a variety of factors. Lancaster Farms assumes no responsibility for these zone suggestions. They are no guarantee plants will **GROW** or survive. **EMPLOYMENT:** Lancaster Farms, Inc. is always looking for talented, hardworking people interested in working for us. However, we are not always hiring. To enquire about employment, please contact us at the address above. We do not discriminate on the basis of age, race, color, national origin, gender, disability or religion. We do discriminate based on the ability to do real work, like spacing #3 can plants. **INTERSHIPS:** Lancaster Farms, Inc. does hire college students majoring in Horticulture or related fields. Contact us for employment. **CHARITY:** We are proud servants to our community. For charitable inquiries, please contact us in writing. **ASSOCIATIONS:** We are active members of many trade and industry associations, including: the Virginia Nursery & Landscape Association, American Hort, the Southern Nursery Association and the International Plant Propagators Society. **ACKNOWLEDGEMENTS:** Special thanks to all who contributed to the PlantBook: Leon Guanzon, Cheryl Lajoie, Matt Nagle, Julie Farris, Hank Thornburg, Sarah Jordan, Jason Adkins, and Christina Keeling.

THANKS: To all of our AWESOME customers. We appreciate your support and that you have made quality a Matter of Choice for over 40 years. **WE HOPE YOU ARE INSPIRED TO DESIGN AND PLANT SOMETHING BEAUTIFUL.** Solo Deo Gloria !
